PharmaLCA: The accessible LCA software for pharma

Create Life Cycle Assessments (LCAs) compliant with the PAS 2090 standard

From standard to execution

PAS 2090 provides the pharmaceutical sector with a common methodology for measuring and reporting product environmental impacts. PharmaLCA, a practical software platform developed by the *Pharma LCA Consortium* and AllocNow, translates the standard into guided workflows designed to make pharmaceutical product life cycle assessments more accessible.

Who is PharmaLCA for?

- Pharmaceutical companies
- CDMOs and suppliers
- Sustainability teams
- LCA and product specialists

As a web-based solution, the tool requires no installation and is designed to support all stakeholders across the pharmaceutical value chain, regardless of their level of life cycle assessment experience.

Features of PharmaLCA

- Conduct PAS 2090-compliant LCAs*
- Built-in environmental data and guided workflows
- Identify environmental hotspots
- Generate reports ready for internal and external use
- Suitable for both non-experts and LCA specialists

*The software has successfully undergone an independent evaluation by TÜV SÜD based on the requirements of PAS 2090.
